

DEFENSE INTELLIGENCE AGENCY

WASHINGTON, D.C. 20340- 6537

16 June 1988

TO: IC Staff Future Signals Environment Working Group (S)

SUBJ: Comments to Volumes I and II of the Future Signals Environment Report (S)

1. Preliminary comments submitted by three organizations within DIA are presented below. The formal DIA chop will not be accomplished until next week.

Volumes I and II

- Needs an Executive Summary, separate from and much shorter than found in Vol. I. Suggest 6 - 8 pages, max.
- Vol. II is too long, and quite repetitive in several areas - needs to be condensed if at all possible.
- Vols. I and II need a ready index; the document is too massive to find subjects of interest.
- The report represents a wealth of information. It should be maintained and updated regularly. (C)

Special Supplement to Volume II

- No substantive comments/issues noted; found a few grammatical errors. Will provide formal comments with DIA letter of approval. (U)

Special Annex

- No major discrepancies - noted a return to a more "hostile" threat environment (evidently the previous version had appeared to be somewhat softened from the original draft). Complete pre-pub comments will be forwarded in conjunction with DIA's formal response (thru appropriate channels, of course). (C)

2. At DI-NFIB's suggestion, the formal chop from DIA will be solicited from the DIA National Intelligence Estimates 'sponsor', Dr. Sen. Mr. Dave Goldman will coordinate this action early next week. (U)
